Chapter 1

The beaver builds dams to slow the river and store food for the winter season. (1.1)
The beaver builds dams to slow the river and store food for the winter season. (1.2)
The beaver builds dams to slow the river and store food for the winter season. (1.3)
The beaver builds dams to slow the river and store food for the winter season. (1.4)
The beaver builds dams to slow the river and store food for the winter season. (1.5)
The beaver builds dams to slow the river and store food for the winter season. (1.6)
The beaver builds dams to slow the river and store food for the winter season. (1.7)
The beaver builds dams to slow the river and store food for the winter season. (1.8)

Section 2

The beaver builds dams to slow the river and store food for the winter season. (2.1)
The beaver builds dams to slow the river and store food for the winter season. (2.2)
The beaver builds dams to slow the river and store food for the winter season. (2.3)
The beaver builds dams to slow the river and store food for the winter season. (2.4)
The beaver builds dams to slow the river and store food for the winter season. (2.5)
The beaver builds dams to slow the river and store food for the winter season. (2.6)
The beaver builds dams to slow the river and store food for the winter season. (2.7)
The beaver builds dams to slow the river and store food for the winter season. (2.8)

Section 3

The beaver builds dams to slow the river and store food for the winter season. (3.1)
The beaver builds dams to slow the river and store food for the winter season. (3.2)
The beaver builds dams to slow the river and store food for the winter season. (3.3)
The beaver builds dams to slow the river and store food for the winter season. (3.4)
The beaver builds dams to slow the river and store food for the winter season. (3.5)
The beaver builds dams to slow the river and store food for the winter season. (3.6)
The beaver builds dams to slow the river and store food for the winter season. (3.7)
The beaver builds dams to slow the river and store food for the winter season. (3.8)

Section 4

The beaver builds dams to slow the river and store food for the winter season. (4.1)
The beaver builds dams to slow the river and store food for the winter season. (4.2)
The beaver builds dams to slow the river and store food for the winter season. (4.3)
The beaver builds dams to slow the river and store food for the winter season. (4.4)
The beaver builds dams to slow the river and store food for the winter season. (4.5)
The beaver builds dams to slow the river and store food for the winter season. (4.6)
The beaver builds dams to slow the river and store food for the winter season. (4.7)
The beaver builds dams to slow the river and store food for the winter season. (4.8)

Chapter 2

The beaver builds dams to slow the river and store food for the winter season. (5.1)
The beaver builds dams to slow the river and store food for the winter season. (5.2)
The beaver builds dams to slow the river and store food for the winter season. (5.3)
The beaver builds dams to slow the river and store food for the winter season. (5.4)
The beaver builds dams to slow the river and store food for the winter season. (5.5)
The beaver builds dams to slow the river and store food for the winter season. (5.6)
The beaver builds dams to slow the river and store food for the winter season. (5.7)
The beaver builds dams to slow the river and store food for the winter season. (5.8)

Section 6

The beaver builds dams to slow the river and store food for the winter season. (6.1)
The beaver builds dams to slow the river and store food for the winter season. (6.2)
The beaver builds dams to slow the river and store food for the winter season. (6.3)
The beaver builds dams to slow the river and store food for the winter season. (6.4)
The beaver builds dams to slow the river and store food for the winter season. (6.5)
The beaver builds dams to slow the river and store food for the winter season. (6.6)
The beaver builds dams to slow the river and store food for the winter season. (6.7)
The beaver builds dams to slow the river and store food for the winter season. (6.8)

Section 7

The beaver builds dams to slow the river and store food for the winter season. (7.1)
The beaver builds dams to slow the river and store food for the winter season. (7.2)
The beaver builds dams to slow the river and store food for the winter season. (7.3)
The beaver builds dams to slow the river and store food for the winter season. (7.4)
The beaver builds dams to slow the river and store food for the winter season. (7.5)
The beaver builds dams to slow the river and store food for the winter season. (7.6)
The beaver builds dams to slow the river and store food for the winter season. (7.7)
The beaver builds dams to slow the river and store food for the winter season. (7.8)

Section 8

The beaver builds dams to slow the river and store food for the winter season. (8.1)
The beaver builds dams to slow the river and store food for the winter season. (8.2)
The beaver builds dams to slow the river and store food for the winter season. (8.3)
The beaver builds dams to slow the river and store food for the winter season. (8.4)
The beaver builds dams to slow the river and store food for the winter season. (8.5)
The beaver builds dams to slow the river and store food for the winter season. (8.6)
The beaver builds dams to slow the river and store food for the winter season. (8.7)
The beaver builds dams to slow the river and store food for the winter season. (8.8)

Chapter 3

The beaver builds dams to slow the river and store food for the winter season. (9.1)
The beaver builds dams to slow the river and store food for the winter season. (9.2)
The beaver builds dams to slow the river and store food for the winter season. (9.3)
The beaver builds dams to slow the river and store food for the winter season. (9.4)
The beaver builds dams to slow the river and store food for the winter season. (9.5)
The beaver builds dams to slow the river and store food for the winter season. (9.6)
The beaver builds dams to slow the river and store food for the winter season. (9.7)
The beaver builds dams to slow the river and store food for the winter season. (9.8)

Section 10

The beaver builds dams to slow the river and store food for the winter season. (10.1)
The beaver builds dams to slow the river and store food for the winter season. (10.2)
The beaver builds dams to slow the river and store food for the winter season. (10.3)
The beaver builds dams to slow the river and store food for the winter season. (10.4)
The beaver builds dams to slow the river and store food for the winter season. (10.5)
The beaver builds dams to slow the river and store food for the winter season. (10.6)
The beaver builds dams to slow the river and store food for the winter season. (10.7)
The beaver builds dams to slow the river and store food for the winter season. (10.8)

Section 11

The beaver builds dams to slow the river and store food for the winter season. (11.1)
The beaver builds dams to slow the river and store food for the winter season. (11.2)
The beaver builds dams to slow the river and store food for the winter season. (11.3)
The beaver builds dams to slow the river and store food for the winter season. (11.4)
The beaver builds dams to slow the river and store food for the winter season. (11.5)
The beaver builds dams to slow the river and store food for the winter season. (11.6)
The beaver builds dams to slow the river and store food for the winter season. (11.7)
The beaver builds dams to slow the river and store food for the winter season. (11.8)

Section 12

The beaver builds dams to slow the river and store food for the winter season. (12.1)
The beaver builds dams to slow the river and store food for the winter season. (12.2)
The beaver builds dams to slow the river and store food for the winter season. (12.3)
The beaver builds dams to slow the river and store food for the winter season. (12.4)
The beaver builds dams to slow the river and store food for the winter season. (12.5)
The beaver builds dams to slow the river and store food for the winter season. (12.6)
The beaver builds dams to slow the river and store food for the winter season. (12.7)
The beaver builds dams to slow the river and store food for the winter season. (12.8)
